

# MSC One™

Access to the broad array of MSC products

## Overview

**MSC One** is an expanded products token system that lets you take advantage of the breadth and depth of MSC Software's simulation portfolio within a flexible token based licensing system\*.

Offered on an annual subscription basis, MSC One provides efficient implementation of your investment in product development with access to a suite of multidisciplinary engineering software tools.

### Key aspects of MSC One include:

- Substantially all current and future products will be available in the MSC One\*.
- As a subscription product, MSC One capacity can be expanded or contracted based on current and future project needs.
- Access to more connected physics and disciplines allows better prediction of part and system behavior.
- Ability to leverage MSC's ecosystem of products including MSC Apex, MSC Nastran, Patran, Adams, Marc, SimManager, MaterialCenter, and more.
- Access to MSC Apex and the new modules as they become available (such as Structures, Nonlinear, Multi-body Systems).

## The MSC One Method

With the new subscription based token system, you receive a pool of tokens. Your tokens are checked out from the pool and are used to access and run a full range of CAE solutions available under the MSC One licensing system from MSC Software. Each individual software item requires a certain number of tokens to run. After each use, your tokens are returned to the pool for other use. There are dozens of software items available under MSC One.

## Who is it for?

- Large-scale global enterprises
- Small-Medium sized companies with tight budgets and heavy engineering needs
- Consulting firms that cannot invest in outright per-seat purchases

## Benefits

- **Innovation**
  - Accelerate innovation in your product line by taking advantage of simulation solutions that your company did not have access to previously.
- **Improve Productivity**
  - Create a flexible environment, as your project and CAE needs mature or change.
- **Reduce Risk**
  - Reduce your financial risk with the ability to increase or decrease capacity as your engineering needs change.
- **Reduce Cost**
  - Obtain access to infrequently-used CAE applications that might otherwise be difficult to cost justify.
  - Consolidate your CAE software suppliers to most effectively stretch your limited budget.
- **The benefits of MSC One will interest your entire organization:**
  - Engineering project managers
  - CAE engineering departments
  - VP of Engineering
  - Purchasing and procurement
